#### **Additional information**

Recommended monitoring procedures:

Personal air monitoring. Room air monitoring

# 8.2. Exposure controls

Engineering measure(s):

Provide adequate ventilation. Organisational measures to prevent /limit releases, dispersion and exposure. See Section 7 for information on safe handling. Apply measures to prevent dust explosions. Ensure equipment is adequately earthed.

# Personal protective equipment:

The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

#### Hand protection:

ш

ш

ш

ш

ш

Wear chemically resistant gloves (tested to EN374). Suitable material: Not determined. Thickness: Not determined. Breakthrough time: refer to the recommendations of the supplier. The quality of the protective gloves resistant to chemicals must be chosen as a function of the specific working place concentration and quantity of hazardous substances.

# Eye protection:

Use suitable eye protection (EN 166): Safety glasses with side shields

# Body protection:

Wear suitable protective clothing. Overalls, apron and boots recommended.

# Respiratory protection:

Wear suitable respiratory protection. Effective dust mask (EN 149). Half-face mask (DIN EN 140). full face mask (DIN EN 136). Filter type: P3 (EN 143). When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.

#### Thermal hazard protection:

Not required for normal conditions of use. Use dedicated equipment.

#### Environmental exposure controls:

Avoid release to the environment. Comply with applicable Community environmental protection legislation.
